	Memorandum										
DATE:	October 3, 2018										
To:	Angela Calvillo, Clerk of the San Francisco Board of Supervisors										
THROUGH: Aging and Adult Services Commission											
From:	Shireen McSpadden, Executive Director, Department of Aging and Adult Services Carrie Wong, Long Term Care Operations Director										
Subject:	Community Living Fund (CLF): Program for Case Management and Purchase of Resources and Services. Six-Month Report: Jan-June 2018										

Overview

The San Francisco Administrative Code, Section 10.100-12, created the Community Living Fund (CLF) to support aging in place and community placement alternatives for individuals who may otherwise require care within an institution. This report fulfills the Administrative Code requirement that the Department of Aging and Adult Services (DAAS) report to the Board of Supervisors every six months detailing the level of service provided and costs incurred in connection with the duties and services associated with this fund.

The CLF program provides for home- and community-based services, or a combination of equipment and services, that will help individuals who are currently, or at risk of being, institutionalized to continue living independently in their homes, or to return to community living. This program, using a two-pronged approach of coordinated case management and purchased services, provides the needed resources, not available through any other mechanism, to vulnerable older adults and adults with disabilities.

The CLF Six-Month Report provides an overview of trends. The attached data tables and charts show key program trends for each six month period, along with project-to-date figures where appropriate.

Key Findings

Referrals & Service Levels

- The CLF program received 172 total new referrals, a slight decrease from the prior period but generally consistent with trends over the program. Most (84%) of those referred were eligible and most of these have been served.
- 309 clients were served by the intensive case management program provided by the Institute on Aging (IOA). This is consistent with IOA enrollment trends over the life of the program. The most clients ever active in a six month period was 316 individuals between January and July 2017.

Demographics

Trends in CLF referrals are relatively consistent with slight shifts over time:

- Consistent with overall program trends to date, almost two-thirds of referred clients were seniors aged 60 and up. In 2011 and 2012, referred clients were more equally split between seniors and younger adults with disabilities (aged 18-59), but seniors typically represent the majority of referrals.
- Trends in the ethnic profile of new referrals remain generally consistent with prior periods with some slight changes. Referrals for White clients have declined slightly compared to recent periods (34% compared to over 40% in recent periods) but remain the largest group. Referrals made on behalf of African-Americans continue to represent about a quarter of referrals (23%). Referrals for Latino clients continue to increase (22% compared to an average of 14% over the program history); this likely reflects the hiring of a new Spanish-speaking case manager in the prior reporting period. Referrals for Asian/Pacific Islander clients also represent an increase over the prior period (17% compared to 10%).
- Referrals for English-speaking clients continue to dominate at 69% in the current reporting period. The second most common primary language remains Spanish (13%). Approximately 14% speak Asian/Pacific Islander languages, most commonly Cantonese (9%). This represents an increase over the prior period, which likely reflects the return of the Cantonese-speaking case manager who had been out on leave.
- Males continue to represent the majority of referrals (59% in the current period). One percent of referred clients (two individuals) identified as transgender.
- Referred clients are most frequently heterosexual (59% of all referrals; 83% of referrals with a documented response to the sexual orientation question). Nine percent of all referrals were for persons identified as gay/lesbian/same-sex loving and two percent were for persons identified as bisexual. Approximately 17% of referrals were missing sexual orientation data in their application for CLF services.
- The most frequent zip code for referred clients remained 94102 (12% of referrals). This area includes the Tenderloin and Hayes Valley areas. Other common areas are 94116 (Parkside, Laguna Honda) with 11% of all referrals, 94103 (SOMA) with 9%, and 94109 (Nob Hill, Polk Gulch) with 8%.
- Referrals from Laguna Honda Hospital represent 22% of all referrals. This is consistent with the prior period and remains lower than trends over the entire program history. Between 2010 and 2016, 35% of referrals on average came from Laguna Honda Hospital. This likely reflects broader trends in the Laguna Honda Hospital client population and availability of appropriate housing to support safe discharge and stability in the community. Many Laguna Honda Hospital residents need supportive housing, such as Direct Access to Housing (DAH), but there is a waitlist for this type of housing.

Service Requests

Self-reported service needs remain consistent with prior periods. The most commonly-requested services at intake include: case management (74%), in-home support (62%), and assistive devices (45%).

Program Costs

The six-month period ending in June 2018 shows a net increase of \$283,696 in CLF program costs over the prior six-month period ending in December 2017. This is primarily due to increases in expenditures from the contracts with IOA and with Brilliant Corners.

Total monthly program costs per client¹ averaged \$2,079 per month in the latest six-month period, an increase of \$75 per month over the prior six-month period. The increase in average cost per client was largely due to the increase in expenditures from the Brilliant Corners contract. Excluding costs for home care and rental subsidies, average monthly purchase of service costs for CLF clients who received any purchased services was \$232 per month in the latest reporting period, an increase of \$92 per client from the previous six-month period.

Performance Measures

DAAS is committed to measuring the impact of its investments in community services. The CLF program has consistently met and exceeded its goals to support successful community living for those discharged from institution or at imminent risk of institutionalization. Given this demonstrated success, DAAS shifted focus to the below two new performance measures beginning in FY 15/16:

Percent of clients with one or fewer unplanned ("acute") hospital admissions within a six month period (excludes "banked" clients). *Goal: 80%*.

With **92%** of clients having one or fewer unplanned admissions, the CLF program exceeded the performance measure target. DAAS will continue to monitor this measure and evaluate the goal threshold.

 Percent of care plan problems resolved, on average, after one year of enrollment in the CLF program (excludes "banked" clients). Goal: 80%

On average, **65**% of service plan items were marked as resolved or transferred. This is slight improvement over the prior reporting period. This change reflects internal process improvements that IOA will continue to build upon in the next period. Additional strategies to improve performance include but are not limited to database updates to streamline the service plan tool, further enhancing supervision processes focused on service plan completion, and increasing the frequency of all-staff service plan meetings. Review of current period

¹ This calculation = [Grand Total of CLF expenditures (from Section 3-1)]/ [All Active Cases (from Section 1-1)]/6.

performance also indicates that a minority of cases pull down the average estimate. Over half of service plans have exceeded the target threshold of 80% of service plan items complete. IOA will examine the cases with fewer service plan items completed to better understand what may be impacting this trend.

Systemic changes / Trends affecting CLF

- As of August 2018, there are 47 referrals awaiting assignment. On average, these clients have been waiting for 103 days. Most of these referrals were submitted in March and April; the oldest referral is from March 2018.
- During this reporting period, the CLF program discharged a total of 28 residents from eight (8) unique skilled nursing facilities; Laguna Honda Hospital accounted for 15 of which five (5) residents transitioned into Scattered Site Housing units managed by Brilliant Corners. The CLF program facilitates monthly Multi-Disciplinary Team (MDT) meetings hosted at IOA to review the prospective referrals from Laguna Honda Hospital for clinical appropriateness of independent community living. CLFeligible individuals living in institutional care who have no appropriate housing alternatives and meet Scattered Site Housing criteria are considered for these units. At the end of June 2018, Brilliant Corners has the capacity to serve approximately seven (7) additional clients.
- The San Francisco Board of Supervisors and DAAS Commission renewed the contract for the Scattered Site Housing Subsidy and Retention Program administered by Brilliant Corners for five years from FY 18/19 through FY 22/23. Services provided through this contract include: rental unit identification and acquisition; rental subsidy administration; tenant-landlord liaison services; housing retention services; unit habitability; tenant well-being inspections; and management of unit modifications for reasonable program are transitioned from institutions into scattered site housing. This has the dual benefit of providing assistance to individuals in the least restrictive environment as well as freeing up institutional beds for those who truly need it.
- Given growing unmet demand for Residential Care Facilities for the Elderly (RCFE) in the CLF program and available capacity in the Brilliant Corners program, three SSH subsidies were converted to RCFE subsidies. The three clients whose monthly SSH patch was funded by CLF now receive support from Brilliant Corners. They remain CLF intensive case management clients. There are currently 30 individuals receiving RCFE patches of which at least 33% were homeless when they transitioned from skilled nursing facilities. Due to the fact that RCFE subsidies are high for low-income clients, the CLF program is currently at capacity for subsidies available for individuals requiring RCFE level of care.
- CLF continues to support the Shanti Project/PAWS (Pets are Wonderful Support) for animal bonding services for isolated LGBT older adults and adults with disabilities who meet CLF criteria. CLF helped increase the Shanti Project/PAWS capacity to

assist isolated, low-income, and frail individuals by funding \$75,000 in purchases of tangible goods and services consisting of pet food and litter (43%), veterinary care (42%), pet supplies (14%), and emergency boarding (1%). From July 2017 through June 2018, Shanti Project/PAWS was able to serve a total of 199 unduplicated clients, allowing them to afford other necessities and/or access to medical care while their pet-related needs were being met by CLF. Based on the annual Shanti Project/PAWS satisfaction survey, 78% of respondents reported positive health impacts and that the CLF-funded goods and services helped reduced their risk for hospitalization.

- The CLF program began serving individuals under the Human Service Agency's new Housing and Disability Income Advocacy Program (HDAP). Overseen by the California Department of Social Services (CDSS), HDAP is a county-administered program that assists individuals with disabilities who are experiencing homelessness apply for disability benefit programs and provides housing assistance during the application period. CLF's role will be to transition clients into housing identified by HDAP, using intensive case management and purchases of services when appropriate. Approximately 30 individuals will be served annually under this partnership. The goals are to: help individuals access to HSA's robust Social Security Income (SSI) Advocacy Program; link them to supportive housing though a subsidy; provide case management and housing stabilization services; and plan for a successful transition from the program when SSI is awarded.
- IOA has a new contract partner with Self-Help for the Elderly (SHE) for a bilingual Registered Nurse to provide nursing consultation services as well as carry a caseload of clients requiring medically-intensive care management services. SHE has long been a leader in the San Francisco community supporting older adults and promoting independence, dignity and self-worth. As 90% of the SHE client population are of Asian and Pacific Islander (API) descent, this partnership is anticipated to improve CLF's capacity to outreach and serve individuals representative of San Francisco's diverse population.
- CLF has implemented changes to increase access for the API population. In addition to the new contract with SHE, CLF is prioritizing referrals for those of API descent on the waitlist. CLF will also continue to maximize the dedicated caseloads for bilingual staff who work with the API population as well as ongoing dedication to hiring bilingual staff. Lastly, after some staffing changes, CLF resumed the monthly outreach meetings in August 2018, including the Asian Pacific Islander Partnership, multiple divisions within In-Home Supportive Services, including all supervisors and the Chinese Units, DAAS Integrated Intake, Chinese Hospital, and Self-Help for the Elderly.
- The California Department of Healthcare Services (DHCS) replaced the existing In Home Operations (IHO) MediCal Waiver with the Home and Community Based Alternatives (HCBA) Waiver in QI for FY18-19. IOA has been designated as a Waiver Agency for San Francisco County and is anticipated to serve approximately

160 waiver participants. IOA participated in a readiness review in July conducted by DHCS. Responsibilities of the Waiver Agency includes establishing a vendor network of approved MediCal vendors, authorizing Plan of Treatment services, and providing case management. The statewide impact of this transition will double the waiver slots available.

Notes: Referrals are all referrals to the primary CLF program, operated by the Institute on Aging (IOA). Referrals are counted by month of referral. Clients served include those served by the IOA, as well as those receiving transitional care through NCPHS and emergency meals through Meals on Wheels. Clients served are counted based on program contact date.

Note: Historical figures may change slightly from report to report. "Other" services have historically included purchases such as employment, recreation, education, food, social reassurance, caregiver training, clothing, furniture, and other one-time purchases. In June 2016, the Medical Services category was incorporated into Health Care. In December 2016, the Scattered Site Housing category was added to track spending of the FY 15/16 CLF growth (prior to this time, CLF funded a very limited number of ongoing SSH patches). Note: CLF must contract year-round with a non-profit housing agency to reserve these units and ensure options are available when clients discharge from SNFs. Therefore, the total purchase amount listed may not be an accurate reflection of average cost per client servet. Client counts reflect unique clients with any transaction of that type.
