MEMORANDUM								
Date:	April 1, 2015							
То:	Angela Calvillo, Clerk of the San Francisco Board of Supervisors							
THROUGH:	Aging and Adult Services Commission							
From:	E. Anne Hinton, Executive Director, Dept. of Aging and Adult Services Linda Edelstein, Long Term Care Operations Director							
Subject:	Community Living Fund (CLF): Program for Case Management and Purchase of Resources and Services. Six Month Report: July-Dec, 2014							

OVERVIEW

The San Francisco Administrative Code, Section 10.100-12, created the Community Living Fund (CLF) to support aging in place and community placement alternatives for individuals who may otherwise require care within an institution. This report fulfills the Administrative Code requirement that the Department of Aging and Adult Services (DAAS) report to the Board of Supervisors every six months detailing the level of service provided and costs incurred in connection with the duties and services associated with this fund.

The CLF provides for home and community-based services, or a combination of equipment and services, that will help individuals who are currently, or at risk of being, institutionalized to continue living independently in their homes, or to return to community living. This program, using a two-pronged approach of coordinated case management and purchased services, provides the needed resources, not available through any other mechanism, to vulnerable older adults and younger adults with disabilities.

The CLF Six-Month Report provides an overview of trends. The attached data tables and charts show key program trends for each six month period, along with project-to-date figures where appropriate.

Key Findings

Referrals & Service Levels

- The CLF received 111 total new referrals, of which most (76%) were eligible. This decrease in referrals (down from 142 in the last period) mirrors a prior trend. After periods with higher levels of referrals, subsequent periods tend to temporarily see less referrals.
- 631 clients received service, which is the most ever served in a six month period. This increase was driven primarily by growth in the client population served by transitional care purchases through the San Francisco Senior Center (SFSC), a subsidiary of Northern California Presbyterian Homes and Services (NCPHS). The DAAS San Francisco Transitional Care Program (SFTCP) lacks flexible funding, and these purchases are provided to SFTCP clients who meet CLF eligibility criteria.

DAAS has focused on expanding the SFTCP program in the last year and has seen a significant increase in referrals.

- Enrollment in the core services provided by the Institute on Aging (IOA) peaked at 369 during July – December 2009 and is now at 274. Over the last two years, the program has typically served around 300 clients per period. IOA's capacity to serve clients was impacted by multiple care manager vacancies during the last period, but the agency is working on filling these positions.
- Forty-three percent of program enrollees in the last six months were in the IOA's CLF program, 42% of whom received service purchases. The remaining were in San Francisco Senior Center's (SFSC) Homecoming transitional care and Meals on Wheels (MOW) emergency home-delivered meal programs.

Demographics

Trends in CLF referrals are relatively consistent with slight shifts over time:

- Referrals for younger adult consumers continue to represent a significant portion of referrals (37%).
- Almost one-third (32%) of all referrals were from White consumers. Referrals for African Americans increased slightly (22%). Chinese referrals remained low (10%) compared to citywide demographics. Referred consumers not reporting ethnicity data continue to decline due to program staff efforts to improve data collection (down to 7% this period).
- ✤ Referrals for English-speaking clients continue to dominate (78%).
- Referrals for consumers living in 94116, home to Laguna Honda Hospital, continue to be high (currently 23%). Many referrals (14%) also come from consumers living in 94102, which includes the Tenderloin and Hayes Valley areas. As a comparison, the combined average of all other neighborhoods is 3%.
- Referrals from Laguna Honda Hospital remain high at 42% of all referrals.

Service Requests

Case management, in-home support, and housing-related services remain among the most commonly-requested services at intake, although the percentage of new referrals requesting these services declined slightly. Mental health/substance abuse services and assistive devices also continue to be highly requested at the point of referral in the last six months.

Program Costs

Total program expenditures peaked during January – June 2010 at \$2.8 million, exhausting prior year carry-forward funding. Expenditures in the first half of FY14-15 were \$1.9, in line with the program budget.

In the FY14-15 addback process, CLF received a one-time allocation of \$200K to fund an entity to develop a MSO (Management Services Organization) to assist San Francisco non-profits. The goal of the MSO project is to organize services provided by community-based service organizations into a viable collection of long term services and supports that will be vended to health plans for purchase for their members; the integration of traditional social services with healthcare will provide a comprehensive bundle of services for seniors and adults with disabilities that will enhance their quality of life and improve provision of services. As noted in the expenditure chart, these funds will be allocated and spent outside of CLF.

- CLF Purchase of Service costs have decreased to less than half the level they were during peak spending in January – June 2010 as the budget has returned to base level. Home care and board and care costs remain the largest categories for purchased services.
- Costs per client are as follows:
 - Total monthly program costs per client¹ averaged \$557 per month in the latest six-month period. This figure has continued to be well below the high of \$1,067 in January – June 2009. Declining average costs have been due, in part, to the program's increased capacity to leverage outside funding such as the NF/AH waiver and the CCT Money Follows the Person Demonstration Project.
 - Average monthly purchase of service costs for CLF clients who received any purchased services was up slightly over previous six-month periods, at \$1,289.
 - Excluding costs for home care and rental subsidies, average monthly purchase of service costs for CLF clients who received any purchased services was \$204 per month in the latest reporting period, an increase from the previous six-month period.

Performance Measures

DAAS is committed to measuring the impact of its investments in community services. The CLF program has consistently met and exceeded its goals to support successful community living for those discharged or at imminent risk of institutionalization. Given this demonstrated success, DAAS plans to shift focus to new performance measures in order to assess other important areas of performance. The third-party data vendor is enhancing the CLF database to support data collection needed to calculate the new measures, which should be reported beginning in FY1516. These two new performance measures will be:

 Percent of care plan problems resolved, on average, after one year of enrollment in CLF at, at least, 80% (excludes clients with ongoing purchases).

¹ This calculation = [Grand Total of CLF expenditures (from Section 3-1)]/ [All Active Cases (from Section 1-1)]/6.

Percent of clients with one or fewer admissions to an acute care hospital within a six month period at least 80%.

Systemic changes / Trends affecting CLF

- The CLF waitlist is currently 16, including three Laguna Honda residents awaiting Board & Care placement through DPH and 13 community referrals. More than half the community referrals currently on the waitlist are unable to access ongoing home care to support independent living; the prohibitive variables are large Medi-Cal share of cost and undocumented status.
- CLF annual satisfaction surveys were sent to all active clients February 2015. Results will be compiled and shared in the subsequent 6 month report.
- In July 2014 a new California Community Transitions (CCT) contract was introduced, including revised protocols, documentation, and processes; the new process has resulted in delayed CCT enrollment for some CLF clients. Department of Health Care Services is also editing documents required for CCT enrollment on an ongoing basis. Billing and recuperation of CCT funds is down and it is unlikely CLF will receive \$140,000 this FY as initially budgeted as a result.
- Diversion and Community Integration Program (DCIP) meetings and access to the DCIP database stopped in May 2014 when a Settlement Agreement expired in a class action lawsuit that initiated the sharing of private healthcare information between Department of Public Health-Laguna Honda and DAAS. Department staffs are meeting to determine the scope of data sharing and develop a business agreement. CLF and LHH continue to collaborate on a weekly basis prioritizing the new referrals and reviewing the current cases, and this is extremely helpful. CLF is adjusting to the challenges of providing support to LHH residents transitioning to the community since the interruption of DCIP and the limiting of client level information. The impact to CLF case managers is most significant in the areas of care coordination and collaborative decision making within the Core Group. The review of the Community Living Plan by the DCIP Core Group (interdisciplinary group of experts with access to services and housing) was extremely helpful in ensuring all services were in place prior to discharge, including appropriate level of housing. When a previously discharged client destabilizes in the community, CLF often brought cases back to DCIP to seek consultation, to access resources from around the table, and/or to engage providers. This support is vital to case managers who are often working alone with medically complex and behaviorally challenged clients.
- CLF is seeking additional funding to serve the unmet needs of the community which are predominately housing and an expansion to the home care service currently being provided. CLF has expanded efforts to collaborate with Skilled Nursing Facilities (SNFs) throughout San Francisco, including Jewish Home,

Tunnell, St. Mary's Distinct Part SNF, Kindred – Golden Gate, SF Healthcare & Rehab, and St. Francis Heights. During this outreach, CLF became acutely aware that lack of housing was the primary barrier to discharge for many SNF residents. As such, CLF has been limited to assist only residents with existing housing in the SNF to community transition.

Notes: Referrals are all referrals to the primary CLF program, operated by the Institute on Aging (IOA). Referrals are counted by month of referral. Clients served include those served by the IOA, as well as those receiving transitional care through NCPHS and emergency meals through Meals on Wheels. Clients served are counted based on program contact date.

** According to the CLF's establishing ordinance, "In no event shall the cost of department staffing associated with the duties and services associated with this fund exceed

15% [...] of the total amount of the fund." When the most recent six-month period falls in July-December, total funds available are pro-rated to reflect half of the total annual fund.

*** FY14/15 Budget includes \$200K of one-time addback funding for Management Services Oraganizations project that will be spent outside of CLF.
